Firebase

Typescript

Experience

Full Stack Development Intern, *Kosoft IT Solution*
Puducherry

Web Development Intern, *Digisailor*
Thoothukudi

Projects

PDF Splitter Bot, *(UIPath, PDF Activities, RPA)*
Developed an automation bot using UiPath to split multi-page PDF files into individual pages or by specified page ranges.

Vehicle Number Plate Detection System,
(Python, OpenCV, YOLOv5, Tesseract OCR)
Built a web-based system to detect and extract license plate numbers from vehicle images using deep learning.

Role-Based Online Examination Platform, *(Next.js, React, Tailwind CSS, Firebase Authentication, Firestore)*
Developed a role-based online examination platform that streamlined user management and exam administration, ensuring a secure, efficient, and user-friendly experience.

Emergency Blood Request Management System,
(Node.js, Java, MongoDB, React, Mapping APIs)
Developed a real-time platform connecting hospitals with nearby blood donors using an intelligent matching algorithm, enabling faster response and efficient emergency coordination.
